

Self-Referential Aptitude Test, by James Propp (*source*)

The solution to the following puzzle is unique; in some cases the knowledge that the solution is unique may actually give you a shortcut to finding the answer to a particular question.

I (James Propp) should mention that if you don't agree with me about the answer to #20, you will get a different solution to the puzzle than the one I had in mind. But I should also mention that if you don't agree with me about the answer to #20, you are just plain wrong. :-)

Note from Owen: This is just for fun. Fun is important. That is all...
